

N-400 BEACH BALL RECALL

By Tommiann S. Hill
Rockingham Community College

Teaching Objective

Sometimes it's difficult for students to remember what is on their N-400 form because they have focused all of their energies on the test questions. This is a fun way for students to recall what is on their N-400 form.

Preparation

Purchase a beach ball at the dollar store for one dollar! Sometimes, they come in packs of two. Be sure to use a Sharpie, because the ink can smear.

1. Inflate the beach ball. Use the bottom of a glass/paper cup, or any other circular object to trace circles on the ball.
2. Inside each circle, write a question from the N-400 form.

The Activity

This works well in a group of 4 – 8 students.

Throw the beach ball to anyone in the class. Be sure that they have a copy of their N-400 form in front of them so they can look at their answer (just in case they have forgotten).

The student who catches the ball reads aloud the circle that their right thumb has covered and responds appropriately.

Once the student answers the question, s/he throws the ball to someone else in the class.

Time devoted to play is based on class needs and interests.
