

Teaching and Delivering Services to the Community College Millennial Student

A Workshop for Faculty

Do you know who makes up your class or student body? Are there different generations present? This workshop will provide information on how you can design and deliver learning experiences or services that encourage student success in all areas. Topics include discussions of the generation cycle and characteristics of the millennial students, as well as best practices and tools to work effectively with this new generation of students. Participants will learn about applying the seven principles of effective teaching, delivery of services to students, and how to develop strategies to make their learning environments rich and productive.

Workshop Agenda:

- The Generation Cycle
- Characteristics of Millennial Students
- NCCC System Student Data
- Best Practices and Tools
- Next Steps

Participant Outcomes:

1. Identify the student populations in your class.
2. Discuss the Generational Cycle.
3. Compare and contrast characteristics of each generation.
4. Describe the instructional needs of the Millennial student.
5. Analyze college student demographic data and determine suggested instructional implications.
6. Share best practices about teaching and working with Millennial students.
7. Develop a plan to apply workshop information to teaching and working with Millennial students.

February 13, 2009

Durham Technical Community College (Main Campus) • **Durham, North Carolina**
